

Media release : FRIZ meets BioValley

The members and friends of BioValley Deutschland e.V. were invited to get to know each other and to individual presentations by companies of the:

Freiburg Innovation Centre (FRIZ).

Date: 5 July 2023 from 2 p.m. to 6 p.m.

Location: FRIZ, Georges-Köhler-Allee 302, 79110 Freiburg, Germany

After two years of construction, the Freiburg Innovation Centre (FRIZ) was opened on 28 September 2022. The first tenants have moved in. The technology centre is located on the grounds of the Technical Faculty of the University of Freiburg. The new building is a highly modern and flexible office and laboratory building. The targeted location in the direct vicinity of universities and research institutions consistently promotes the close exchange of science and business as well as the transfer of knowledge and technology.

With this in mind, over 100 members of the BioValley network (from Germany, France and Switzerland) met with the companies from the Innovation Centre.

Thirteen companies based at the FRIZ introduced themselves with short talks and presentations. Afterwards, there was plenty of time for networking and exchange.

(see enclosed programme)

BioValley Deutschland e.V. is a functioning network of biotech and life sciences companies from Offenburg via Freiburg, Lörrach to Rheinfelden and Weil, with the special feature of a trinational partnership with the same companies in the region, i.e. Alsace and northern Switzerland, where partner associations exist. In addition, there are functioning cooperations with the universities of Freiburg, Basel, Mulhouse and Strasbourg.
